Penn Medicine: Lancaster General Health (Downtown Pavilion)		540 North Duke Street, Lancaster, PA 17602	(717) 544-4930 http://www.lancastergeneralhealth.org/LGH/Our-Services/Outpatient-Services/Pulmonary-Function-Testing.aspx	Doctors use pulmonary function testing to diagnose lung diseases such as asthma and bronchitis. The tests can be helpful in determining what is causing shortness of breath or to evaluate your lung capacity. Pulmonary function testing can also enable doctors to understand how well treatments to improve lung function are working.
Penn Medicine: Lancaster General Health (Suburban Pavilion)		2100 Harrisburg Pike, Lancaster, PA 17604	(717) 544-4930 http://www.lancastergeneralhealth.org/LGH/Our-Services/Outpatient-Services/Cardiac-and-Pulmonary-Testing/Pulmonary-Function-Testing/Services/Schedule-an-Appointment.aspx	Doctors use pulmonary function testing to diagnose lung diseases such as asthma and bronchitis. The tests can be helpful in determining what is causing shortness of breath or to evaluate your lung capacity. Pulmonary function testing can also enable doctors to understand how well treatments to improve lung function are working.
Penn State Children's Hospital (Lancaster Outpatient office)		2170 Noll Drive Suite 300 Lancaster, PA 17603	(717) 435-1000 http://childrens.pennstatehealth.org/display-location/-/location/35/penn-state-children-s-hospital-lancaster-outpatient	We'll take care to identify - and help you avoid - situations that may lead to an asthma attack. You and your doctor will work as a team to manage your asthma. Your treatment plan will focus on controlling airway swelling and avoiding asthma triggers so that you can enjoy everyday activities to the fullest.
